

Invertebrate Art 2014

Unleash your students' creative potential. During this excursion students will investigate a variety of invertebrate habitats and the features of animals living there. Students will use magnifiers to observe the structure and adaptations of invertebrates which will form the basis for a detailed observational drawing. Students will work on paper and canvas and will use a variety of media including rollers, pencils, brushes and acrylic paint. Visit the centre website for a complete description, booking forms and date availability.

Stage 2/3 - Max 2 classes per day - Supports Visual Arts and Science - Cost \$20 per student incl large canvas frame
